Title: PlannerCortex
Three features that we will test are entering tasks, day view of tasks, and registration.

UAT:
1. Registration
    a. User enters all the required information completely and all of their info is unique.
    b. User enters a username that is already taken (in the database).
    c. User enters an invalid email.
    d. User submits without completing all required fields.
2. Entering Tasks
    a. User enters a task and fills in all required fields properly.
    b. User submits the form without filling in all required fields.
    c. User submits the form with start-date after end-date.
    d. User submits the form with all fields filled out but one or more forms in the wrong format.
3. Day View of Tasks
    a. User has a day with no tasks (that day would be empty).
    b. User enters a task that spans multiple days.
    c. User enters a task that only spans one day.
